                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    The invention relates to human nucleic acids (AAI57798-AAI61369) and the encoded polypeptides (AAM38642-AAM42213) with nootropic, immunosuppressant and cytostatic activity. The polynucleotides are useful in gene therapy. A composition containing a polypeptide or polynucleotide of the invention may be used to treat diseases of the peripheral nervous system, such as peripheral nervous injuries, peripheral neuropathy and localised neuropathies and central nervous system disease, such as alzheimer's, parkinson's disease, Huntington's disease, amyotrophic lateral sclerosis, and Shy-Drager Syndrome. Other uses include the utilisation of the activity, chemotactic/chemokinetic activity, haemostatic and thrombolytic activity, cancer diagnosis and therapy, drug screening, assays for receptor activity, arthritis and inflammation, leukaemias and constance.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             WPI; 2001-442253/47.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                밁
CC toxicological response to an agent, which comprises comparing a cypression profile of one or more human toxic response genes to a certaining the presence of a toxic response to the agent. Also catetarning the presence of a toxic response to the agent. Also catetarning the presence of a toxic response to the agent. Also catetarning the presence of a toxic response to the agent. Also catetarning the presence of a toxic response to the agent. Also catetarning the presence of a toxic response to the agent. Also catetarning the partial sequences given in ABS82842 (crown the genes corresponding to the partial sequences given in ABS82842 (crown toxic response gene plays a role on toxic response pathways by catetarning the expression profile of the gene after exposure of cells comprising: (a) exposing cells to an agent or isolating cells from a comprising: (a) exposing cells to an agent or isolating the test gene catetarning the test gene comprising the test profile to the expression profile of a similar function or comparing the test profile to the expression profile of a gene with crown continuous are useful for predicting and determining toxicological responses on a cellular, organ or system level. The arrays comprising the human compounds and chemicals.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Toxicologically relevant human nucleotide sequence

                                                                                                                                                                                                                                                                                                                                                                               This invention describes novel polypeptides and their encoding nucleic acids derived from human pancreatic tumor tissue which have cytostatic activity. The sequences are also useful in producing pharmaceutical compositions for treatment of pancreatic tumors. AAX52885-Z53014 represent expressed sequence tag (EST) fragments derived from a human pancreatic tumor cDNA library and which encode the proteins represented in AAY73814-Y74252.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      WPI; 1999-621386/54.

A directionally cloned cDNA library in the pSPORT1 vector (Life Technologies) was constructed at Bioserve Biotechnology (Laurel MD) essentially following the protocols of the SuperScript Plasmid System full details of which are contained in the manufacturer's instruction manual (http://www.lifetech.com/). First strand synthesis was carried out using a Not I primer-adapter [5'-pGACTAGTTCTAGATCGCGACCGCCC(T)15-3']. EST analysis was performed on the unamplified library at the NIH Intramural Sequencing Center (NISC)."

Library was amplified once on solid support and plasmid DNA from library was prepared. The library DNA was normalized by method $4 from Bonaldo, Lennon, and Soares 1996 Genome Research 6:791-806; 0.5 microgram single-stranded library plasmid DNA was mixed with 5 micrograms PCR product representing library inserts and hybridized to an Ecot of 20. Single-stranded (unhybridized) plasmids were isolated by hydroxyapatite chromatography and used to make this library. 157 g 66 t

                                                                                                                                                                                                                                                                   109
                                                                                                                                                               Conservative
                                                                                                                                                                                                                                                                                                                    (Pharmacia) with a modified polylinker; Site_1: Ecor I; (Pharmacia) with a modified polylinker; Site_1: Ecor I; Site_2: Not I; NCI CGAP_ED] is a normalized cDNA library containing the following tissue(s): Chondrosarcoma cell line CS5. The library was constructed according to Bonaldo. Lennon and Soares, Genome Research, 6:791-806, 1996. First strand cDNA synthesis was primed with an oligo-dr primer containing a Not I site. Double stranded cDNA was ligated to an EcoR I adaptor, digested with Not I, and coloned directionally into pT7T3-Pac vector. The oligonucleotide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is sequence tag for this library tag sequence that is sequence tag for this library is GCTCAAGGCT.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     NCI_CGAP_FG1 is a normalized cDNA library obtained from a pool of mRNA from 2 cell lines from Enchondroma tissues. The library was constructed according to Bonaldo, Lennon and Soares, Genome Research, 6:791-806, 1996. First strand cDNA synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded CDNA was ligated to an EcoR I adaptor, digested with Not I, and cloned directionally into pT/T3-Pac vector. The oligonucleotide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the (dT).8 tail. The sequence tag for this library is CGGTCACTC. The cell lines were provided by Dr.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 TAG_SEQ-CGGTCACTC"
